

VIRTUAL CARE TECHNOLOGY THAT HELPS YOU EXTEND PATIENT SERVICES & ACCESS TO CARE

AMD is a global leader in telehealth solutions, providing telemedicine virtual care technology, software platforms, medical devices, and bundled kits for the last 30 years. Their solutions help customers to expand remote healthcare capabilities.

AMD Telemedicine is a healthcare technology company that specializes in providing telemedicine solutions for healthcare providers. The company offers a comprehensive telemedicine platform that includes hardware and software solutions designed to improve the delivery of healthcare services remotely.

AMD Telemedicine platform includes a variety of telemedicine tools, such as remote monitoring devices, video conferencing software, and electronic health record (EHR) integration. The platform is designed to be user-friendly and customizable, allowing healthcare providers to tailor their telemedicine solutions to meet the specific needs of their patients and clinical workflows.

In addition to their telemedicine platform, AMD Telemedicine also provides a range of professional services such as training, support, and consulting to help healthcare providers successfully implement and use telemedicine technology.

AMD Telemedicine, founded in 1991, has customers that include hospitals, clinics, and other healthcare providers across the United States and around the world.
