

## VIRTUAL CARE PLATFORM AND ENTERPRISE TELEHEALTH

Caregility supports all settings for virtual care, including outpatient telehealth calls, point-of-care encounters, and remote patient monitoring, including transport, emergency, critical, urgent, and behavioral care.

Caregility is a healthcare technology company that specializes in providing telehealth and virtual care solutions to healthcare providers. The company offers a platform that allows healthcare providers to conduct virtual visits, monitor patients remotely, and collaborate with other healthcare professionals using a variety of devices such as desktop computers, tablets, and smartphones.

Caregility's platform is designed to be flexible and customizable, allowing healthcare providers to tailor their telehealth solutions to meet the specific needs of their patients and clinical workflows. The platform also includes features such as secure messaging, real-time video consultations, and virtual waiting rooms, which help to streamline the virtual care process and improve patient access to care.
