

STANDALONE VR HEADSET WITH SIMPLE-TO-USE CONTROLS

ClassVR offers a student and teacher friendly VR headset with built-in educational VR & AR content, and easy-to-use teacher controls. The platform provides simple tools for busy classrooms to deliver an exciting and engaging VR experience for students.

ClassVR is an educational technology platform that provides virtual reality (VR) and augmented reality (AR) experiences for students and teachers. The platform includes a range of VR and AR content, including simulations, interactive lessons, and 360-degree videos that are designed to enhance learning and engagement in the classroom.

ClassVR offers a range of features that are specifically tailored to meet the needs of educators, including the ability to create and share lesson plans, monitor student progress, and control the VR experiences from a central dashboard. Teachers can use ClassVR to bring subjects to life, allowing students to explore topics in a more immersive and interactive way, and to make learning more engaging and fun.

ClassVR can be used in a variety of subject areas, including science, history, geography, and the arts, and is suitable for students of all ages. It provides a hands-on and multi-sensory learning experience, which has been shown to improve information retention, critical thinking, and problem-solving skills.
