VIRTUAL LIVE SUPPORT

We are living in an age where Telemedicine is becoming all the more important than any other branch of medical science. Remote diagnosis, integrated medical communication devices and simulation technologies are helping the world to achieve greater heights in public healthcare.

Granteq's solutions to healthcare industry are helping to revolutionize the way remote patient assessment and care is performed. They are ready to deploy and can also be tailor-made based on the requirement of the organization. Apart from direct solutions to telemedicine, Granteq's expertise in integrated audio visual systems, virtual spaces and education helps health care professionals to collaborate and communicate easily and effortlessly.

With telemedicine solutions, doctors are empowered to expand their reach to treat even those patients that are in remote parts.

Granteq understand that every organization seeks something different. We can craft telemedicine solution specifically to your wants and needs, providing the ability to grow and enhance your program and address specific specialties while always delivering top quality healthcare to all of your patients.

As telemedicine continues to evolve and change the way healthcare is delivered across the world, we are dedicated to further expanding our telemedicine expertise and constantly delivering new medical tools and applications.

Telehealth Solutions for Virtual Care Continuum

Diagnostic Telemedicine Technologies

Modular telemedicine carts and systems are designed to help you meet your specific requirements for form, fit, and function, based on your application. We recognize that every use case is unique in its own way and requires different levels of mobility and/or space limitations. Each telemedicine system is capable of providing the flexibility to integrate various hardware and software components into your final solution.

Direct-to-Consumer Platform

OnDemand Visit is all-in-one direct-to-consumer telehealth platform that enables the highest level of quality and cost effective healthcare for patients, regardless of where they are located. This enterprise-wide virtual care solution engages patients in a more convenient way than in-person office visits.

Employee On-Site Healthcare

Employee On-Site Healthcare offers self-insured employers convenient access to board certified physicians for clinical examinations and on-demand doctor visits, occupational medicine services, and an on-site health coach and general medical liaison. Through our collaborative approach of using telemedicine/telehealth technologies, an onsite medic and a remote physician, your employees will receive immediate access to healthcare, without having to leave your facility.

The focus and goal of Employee On-Site Healthcare is to improve the healthcare of your employees, while saving you as much money as possible.

Simulation Technology

Just as medicine continues to advance, healthcare simulation—and the standards that govern it—are also evolving. It's important that healthcare organizations keep up. Whether you are undertaking a simple refresh or preparing for an extensive simulation renovation, input from AV experts is key to your success. The experts at Granteq are here to help.
