MEETING SPACES THE NEAT WAY

Neat designs simple and elegant video devices that make virtual meetings feel almost as real as meeting face-to-face, seamlessly bringing rich and meaningful experiences to people's work, interactions and lives across any meeting space.

Neat offers video conferencing and collaboration solutions designed for modern meeting rooms. The Neat system includes a range of hardware components, including cameras, microphones, and speakers, as well as a software platform that provides advanced video and audio capabilities.

Neat is designed to provide a simple and intuitive user experience, with features such as automatic camera framing and speaker tracking that help to improve the quality of the meeting and reduce distractions. The system also supports a range of collaboration tools, including screen sharing, document sharing, and digital whiteboarding, which can be accessed from any device.

Neat is designed to be highly interoperable, with support for a range of video conferencing platforms, including Microsoft Teams, Zoom, and Google Meet. This makes it easy for organizations to integrate Neat into their existing workflows and infrastructure, and to collaborate with colleagues and partners around the world.
