

DIGITAL WORKPLACE & VIRTUAL MEETING TECHNOLOGY

X20 Media provides visual communication solutions for the digital workplace, as well as immersive real-time immersive meeting and learning environments.

X20 Media offers digital workplace and virtual meeting technology that provides communication solutions for various industries such as corporate, education, healthcare, hospitality, and retail.

X20 Media's digital workplace platform is designed to be user-friendly and customizable, allowing users to create and manage content through a web-based interface or integrate with other business applications. The platform provides data analytics and reporting capabilities, enabling users to track the effectiveness of their content and make data-driven decisions.

Their virtual meeting technology enables organizations to host virtual meetings, webinars, and events with interactive features such as live polls, Q&A sessions, and screen sharing capabilities. The platform is designed to be flexible and scalable, allowing organizations to host meetings of all sizes and types.
